- Building Trust No. 1 in Vilnyus (N 54-40 E 25-14), which specialized in 50X1-HUM the construction of apartment buildings, constructed the following industrial enterprises: the Elfa plants, the oxygen plant in Vilnyus, and iron foundry in Novaya Vileyka (N 54-42 E 25-21). The foundry, which was constructed between 1954 and 1956, and started operating in late 1956, was subordinate to the Ministry of Local Industry.
- 2. The foundry, which bordened on a sawmill, had one building, in which there was a furnace (vagranka) five meters high and 50 centimeters in diameter. Its output, which included stove doors and grates for domestic brick ovens, was for local consumption. The plant's raw materials consisted of iron from the interior of Russia and coal which arrived at the station in freight cars and was transported to the plant by truck.

2	FC.	RF	Ŧ

- 3. The foundry, which employed 30 workers in one shift, had an annual projected production valued at one-half million rubles.
- 4. Attached for your information are two sketches with legends, of the iron foundry in Novaya Vileyka.

1. The Elmias Leather Products Combine (Kozh. Kombinat	
Elnias) is located on Vilniaus Street in Shyaulysy (N 55-56,	
E 23-19). The factory, employing 2,200 workers, manufactures	
hard and soft leather and shoes of all kinds. It also contains	
a tannery for leather imported from other countries.	50X1-HUN
The factory is supplied with electricity by the	
Shyaulyay thermal power station, located eight km from the town,	
in the village of Rekiva (approximately N 55-53, E 23-30), near	
the lake. The factory has an operational requirement of 450 KW.	
Production figures for the factory are as follows:	
a. Hard leather - approximately 100 tons per month.
